SUMMARY

I'm a self taught design-minded, detail oriented web developer passionate about combining beautiful code with beautiful design.

Offering 2+ of experience providing high-impact web solutions for industry organizations.

In depth knowledge of ES6 concepts like closure, hoisting and asynchronous programming, CSS layout(Flexbox and Grid), working with API's and modern library like React and Redux.

TECHNICAL SKILLS

• **HTML5** • **CSS3** • **Bootstrap**

•

• **React.js** • **Redux**

• **JavaScript(ES6)** • **MySQL**

• **REST API** • **Node.js** • **JSON**

• **Material UI** • **GIT**

WORK EXPERIENCE

Industrial Web App Developer (Remote)
Jul 2021 - Present

Scotts Miracle-Gro Marysville, Ohio

- Planning and building responsive in-house websites for different warehouses in the US to show the current status of devices such as printers, using HTML, CSS, and Javascript.
- Working closely with the warehouse managers and IT team to meet project requirements, goals, and desired functionality.
- Developed a full-stack auto labeling website using Node.js for backend and React for front-end.

Freelancing Web Designer

Maaviwanderer

- Responsible for the graphic design and implementation of the company website including navigation, writing HTML and JavaScript, and optimization of web graphics.
- Consulted with the client to outline website goals, illustrate wireframe, and site functionality
- Wrote About Page biography, designed and shaped graphics, corrected image problems, and formatted company logo for the Web

IT System Analyst Level 2
Nov 2018 - Jun 2021

Reena.org

- Serving as a team leads backup on Windows server, corporate network, and infrastructure. Also, mentoring and training new employees.
- Troubleshoot and resolve technical issues related to hardware, software, and network connectivity.
- Worked on various cybersecurity projects such as deploying Cisco Umbrella to all the wireless devices and implementing Multi-Factor Authentication organization-wide.

Project Work

1. React COVID-19 Tracker
   Live:https://react-covid-app-26f4f.web.app/
   A Covid-19 tracker App that provides real-time data on the worldwide and country-wise number of active recovered and death cases. This Web App is designed on Reactjs and used open-source API to fetch real-time data and used NPM like Material UI for designing.
2. Toronto Bakery
   Live link: https://bakerywebsite-de041.web.app/
   As a part of my course project, I have created this e-commerce website. For this project, I have used Commer.js to create an online API of the products and used another dependence such as material UI and react stripe.
3. Crypto Channel
   Live:https://bitcoin-14611.web.app/
   This website will provide you all the latest information and price of Top 100 bitcoins. For this project I have used React for front-end , redux toolkit, used Coinranking API to fetch real-time data and for live news feed I have used bing news search API.

EDUCATION

Certification in Full Stack Web Development   Sep 2020 - May 2021

York University   Toronto, CA

Post-Secondary Diploma Degree in Computer System Technician (Networking)   Jan 2017 - May 2018

Centennial College Progress Campus   Toronto, CA

Bachelor's in Computer Science   Aug 2011 - May 2015

Institute of Engineering & Technology Bhaddal   Punjab, IN
